

LONG WAVE INFRARED DETECTOR

The company designs, develops and manufactures Infrared (IR) detectors at its dedicated facility in Southampton, UK. With a reputation for providing customers with the best in high performance and costeffective technology for IR camera systems, the company offers a unique level of expertise.

The Hawk Long Wave Infrared (LWIR) detector is a compact and lightweight 640 x 512 Mercury Cadmium Telluride (MCT) Integrated Detector Cooler Assembly (IDCA). The Hawk LWIR detector is designed for high performance, low cost imaging inthe 8-10µm waveband.

Using the MCT process, the Hawk LWIR detector provides the highest environmental integrity along with the superior performance of focal plane detectors.

MAIN FEATURES

- Extremely short stare time, typically 200µs, yielding minimum motion blur
- Simple to use
- Long Wave (LW) 8 10μm
- Small element pitch enables miniaturisation of the Dewar assembly and optics
- High electro-optic performance with low crosstalk, automatic anti-blooming at the pixel level and excellent sensitivity
- Interlaced readout mode doubles storage capacity available for each pixel, enabling a significant reduction in NETD
- Windowing gives enhanced frame rates over selected areas of the array
- Highest LW technology performance available in the world
- Longest LW technology DRI ranges
- Reduced stare time, less motion blur than QWIP detectors
- High performance in low scene temperature.

HAWK

KEY BENEFITS

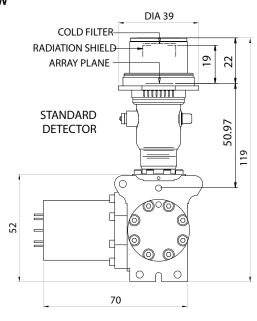

Low cost

CompactHigh resolution.

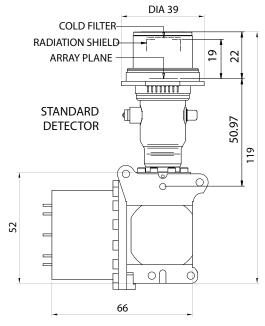

FORMAT

Lightweight

IDCA 6W

IDCA 8W

All dimensions in millimetres

TECHNICAL SPECIFICATION

INTERFACE PARAMETERS	
Modes	Snapshot or interlaced
Configuration Control	Single serial interface
Output Voltage Range	2.5V
Charge Capacity	7 x 10 ⁶ electrons
	(14 x 10 ⁶ interlaced mode)
Number of Outputs	4
Pixel Rate	Up to 10MHz per output
Intrinsic MUX noise	50uV rms
Array Operating Temperature	Up to 90K
Nominal Operating Voltage	6V
Minimum Pins for Operation	16
Number of Input Clocks	1
Window Material	Germanium
Window Thickness	1.73mm
Cold Filter Material	Silicon
Cold Filter Thickness	0.4mm

ICDA 6W		
Weight	350g	
Power Consumption	6W steady state	
Cooling Engine	Rotary Stirling engine	
Operating Temperature Range	-40°C to +70°C	

IDCA 8W		
Weight	500g	
Power Consumption	8W steady state	
Cooling Engine	Rotary Stirling engine	
Operating Temperature Range	-40°C to +70°C
